

YOU CAN TEACH AN OLD DOG NEW TRICKS

FOAMPRO®

Precision foam every time

A FoamPro retrofit increases the efficiency of your older equipment by delivering the well-known advantages of Class A foam:

- Increased firefighter safety
- Quicker knockdowns
- Better exposure protection
- Fewer rekindles
- Quicker mop-up operations
- Reduced water use
- Less environmental damage
- Reduced property damage
- Faster return to service

Instant Upgrade to Increase Fire Fighting Abilities

FoamPro systems are easily retrofitted to any vehicle, which instantly improves your ability to fight fires. With the simple push of a button, our high-tech systems will proportion "precision foam every time." We offer a variety of exclusive features that provide:

- Accurate, automatic proportioning
- Cost savings over inaccurate proportioning
- Displays for continuous system monitoring
- SAE-tested reliability, exceeding NFPA standards
- Class A and/or Class B foam applications
- Exceptional customer service, field support and training
- Discharge side injection, keeping foam away from pump
- Continuous operation while refilling foam tanks
- No in-line restrictions
